

APPRENTICESHIP PROGRAMME

WHAT IS IT?

As an apprentice you'll be based at our facilities four days a week, with a fifth at college, quickly developing your engineering skills with practical on the job experience. You'll be working across a range of different departments from precision tooling and quality control, to electric melt and casting. Not only will you gain expertise in these departments, but you'll personally develop a professional workplace acumen.

WHY MFG AND THIS ROLE?

Engineering is the most in demand employment sector in the world and an apprenticeship at MFG, enables you to learn at the world's leading engineering and manufacturer of cast and machined automotive products. You'll earn a Level 3 BTEC or City & Guilds qualification, with the opportunity to further your studies and undertake a Higher National Diploma or Open University course; all subsidised by MFG.

WHAT DO I NEED?

There are no specific requirements for entry onto an apprenticeship with MFG, however it would be advantageous to have some qualifications in Maths and Science.

WHERE WILL I BE BASED?

You will be based at our Eurac Poole site in Dorset for four days a week, with the other day at Bournemouth & Poole College.

HOW DO I APPLY?

Please visit www.matfoundrygroup.com/Contact and fill out the Eurac Poole UK section or email your CV and covering letter to Claire Keep at claire.keep@eurac-group.com
